Do not use
I do not use it. Sunday service is very much needed. Staff working at Portavadie and kids needing to get home from Dunoon on a Sunday.
Local provision is not suitable for any kind of commuting to work.
No public transport B8000
No Sunday buses.
Public transport is very limited. In fact so limited that I cannot use it due to inconvenient timing of buses
There isn't any
There's probably just enough buses during the week but for example no buses on a Sunday isn't

Like everything, Tighnabruaich would benefit from investment in the jetty for example to bring more tourists in
No especially at night. There is not enough street lighting
No public spaces
Really
Tighnabruaich is a beautiful place
To attract tourism you need more attractions
Vacant shops are a disappointment, and they bring down the attractiveness of any area.

Although the beach can be pretty smelly at times.
Could be better in Dunoon
Lochside private road
On my doorstep
We are fortunate to be surrounded by a world class natural environment
We have a lot of attractive woodland. It is spoiled by equipment and materials left around by the people who are responsible for its upkeep. Parts of the local Community Forest look more like a distant Migrant Encampment than a well-funded community resource.
Yes. But all is forestry land.

Many second-homes. They bring in some money, but they are soul-less as they sit in darkness for much of the year. We appear to have an embarrassment of social housing. What are the residents (if we find any) going to do by way of work?
More homes are required to allow people to stay long term in the village. Apparently the new housing being built is affordable but from what I've heard it still won't be affordable for most.
New homes being built just now.
New homes currently under construction will improve the housing situation.
No not enough 1 or 2 bed properties
No. We always need more social housing. Everybody seems to have their name down locally for one of the new development in Tighnabraich. However I think more people than houses! Cheap affordable rented accommodation is very scarce here. If we want to encourage young people to stay and new people to move here we need more of this.
Plenty of housing
Rural estate

A local meeting place, particularly for older people would be an advantage.
Don't want to meet people
Limited opportunities for older people who have mobility issues.
No
People who want to mix have to get out and make the effort. There are many Clubs, Societies, and functions for those who wish to use them. Without the efforts of just a few stalwarts, most of these would fold.
Places to meet friends is either at a pub or cafe. Maybe some more options needed
Thanks to the local community efforts.
There are many community lead activities here. However they are not always well supported. Very difficult in small communities.

Quality jobs needed. An alternative plan needs to be in place to make up the shortfall created by council cutbacks.
Pot hole maintenance More passing places B8000 Better information concerning local meeting about the area.
Sewage system should be extended the whole way along the seafront, particularly given importance of tourism
Condition of single track roads made narrower by collapsed edges and poor condition of passing places other than timber routes
I'm no particular order Safe cycling, litter picking, activities for young people, dealing with social isolation older people and folk with mental health issues, cleaning signage
New ideas needed, and there are plenty if people all look the same way instead of talking down good ideas that would bring in revenue.
Pedestrian Facilities Youth Employment Traffic calming
Dog park needed. More affordable housing More for young people to do...especially visitors to the area and our local kids.
More facilities and activities to encourage tourism. More bins for camper van tourists and more signage detailing how cyclists should use single track road passing places!
Roads...roads...roads! Stop rogue log carriers. Make them obey the TTMG.

Local working group to organise maintenance activities. Possibly criminal justice could provide workforce.

Local information website, not Facebook. To be able to sign up with your own email address concerning local development. On the whole I am quite satisfied, but it could be better. I am aware money is tight not just for the council, everyone else as well these days.

Completion of sewage system

High quality repairs

Council support to local activists that goes beyond words. A little cash towards these things would go a long, long way

Invite business people in the area and ask them.
